

APPENDIX 9

UK SUDS GREENFIELD RUNOFF RATE ESTIMATION

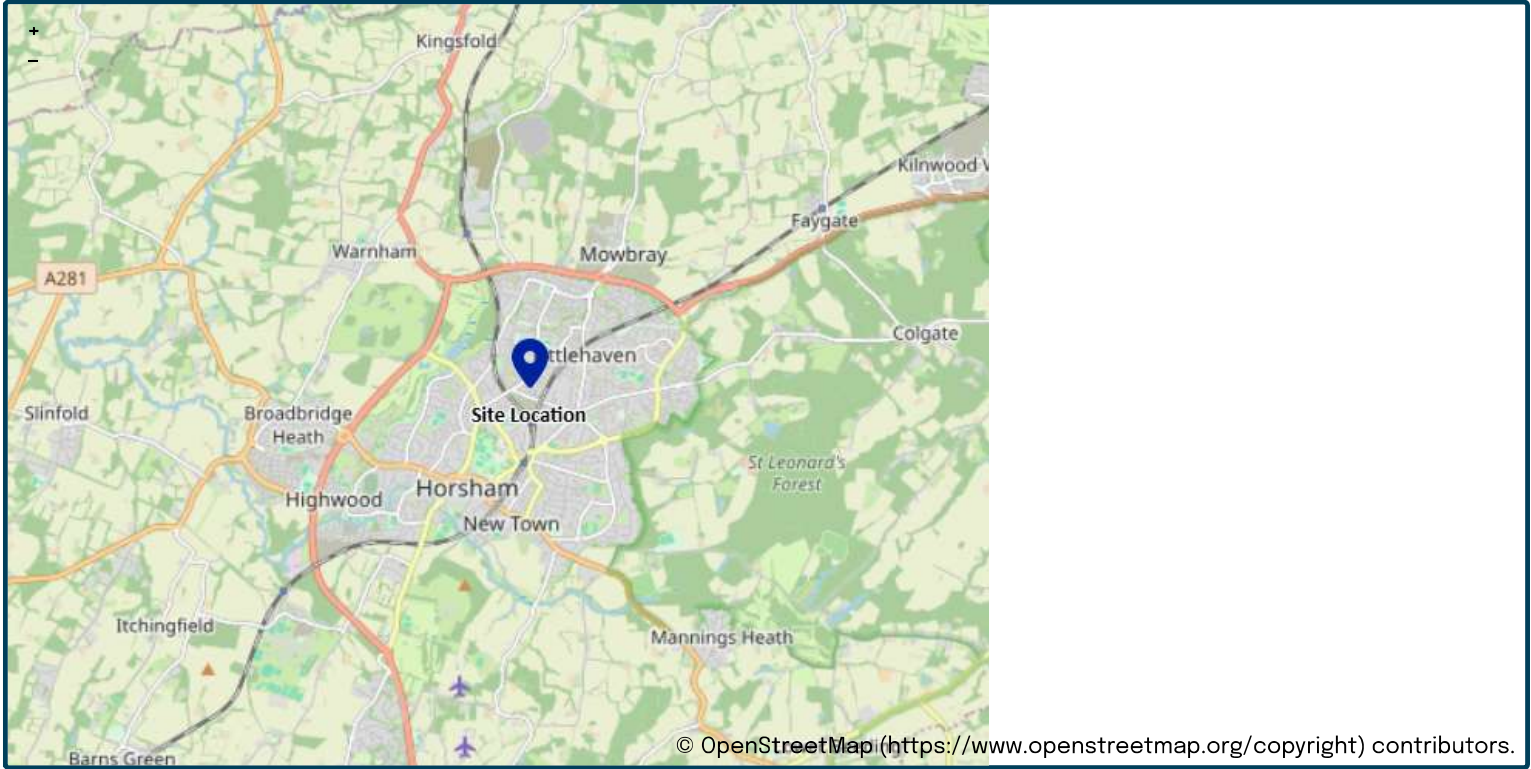

This is an estimation of the greenfield runoff rates that are used to meet normal best practice criteria in line with Environment Agency guidance “Rainfall runoff management for developments”, SC030219 (2013), the SuDS Manual C753 (CIRIA, 2015) and the non-statutory standards for SuDS (Defra, 2015). This information on greenfield runoff rates may be the basis for setting consents for the drainage of surface water runoff from sites.

Project details

Date	<input type="text" value="28/08/2025"/>
Calculated by	<input type="text" value="Tommy Ashby"/>
Reference	<input type="text" value="Novartis"/>
Model version	<input type="text" value="2.1.2"/>

Location

Site name	<input type="text" value="Novartis"/>
Site location	<input type="text" value="Horsham"/>

Site easting (British National Grid)	<input type="text" value="517960"/>
Site northing (British National Grid)	<input type="text" value="131681"/>

Site details

Total site area (ha)	<input type="text" value="7.52"/>	ha
----------------------	-----------------------------------	----

Greenfield runoff

Method

Method	FEH statistical
--------	-----------------

FEH statistical

	<u>My value</u>		<u>Map value</u>
SAAR (mm)	<input type="text" value="789"/>	mm	<input type="text" value="789"/>
BFIHOST	<input type="text" value="0.536"/>		
QMed-QBar conversion	<input type="text" value="1.136"/>		<input type="text" value="1.136"/>
QMed (l/s)	<input type="text" value="26.61"/>	l/s	
QBar (FEH statistical) (l/s)	<input type="text" value="30.23"/>	l/s	

Growth curve factors

	<u>My value</u>		<u>Map value</u>
Hydrological region	<input type="text" value="7"/>		<input type="text" value="7"/>
1 year growth factor	<input type="text" value="0.85"/>		
2 year growth factor	<input type="text" value="0.88"/>		
10 year growth factor	<input type="text" value="1.62"/>		
30 year growth factor	<input type="text" value="2.3"/>		
100 year growth factor	<input type="text" value="3.19"/>		
200 year growth factor	<input type="text" value="3.74"/>		

Results

Method	FEH statistical	
Flow rate 1 year (l/s)	<input type="text" value="25.7"/>	l/s
Flow rate 2 year (l/s)	<input type="text" value="26.6"/>	l/s
Flow rate 10 years (l/s)	<input type="text" value="49.0"/>	l/s
Flow rate 30 years (l/s)	<input type="text" value="69.5"/>	l/s
Flow rate 100 years (l/s)	<input type="text" value="96.4"/>	l/s
Flow rate 200 years (l/s)	<input type="text" value="113.1"/>	l/s

Please note runoff estimation is subject to significant uncertainty. Results are therefore normally reported to only 1 decimal place. Where 2 decimal places are provided, this does not indicate accuracy to this level, it has been adopted to prevent ‘zero’ figures from being reported. Outputs less than 0.01 l/s are reported as 0.01 l/s.

Disclaimer

This report was produced using the Greenfield runoff rate estimation tool (2.1.2) developed by HR Wallingford and available at uksuds.com (<https://www.uksuds.com/>). The use of this tool is subject to the UK SuDS terms and conditions and licence agreement, which can both be found at uksuds.com/terms-conditions (<https://www.uksuds.com/terms-conditions>). The outputs from this tool have been used to estimate Greenfield runoff rates. The use of these results is the responsibility of the users of this tool. No liability will be accepted by HR Wallingford, the Environment Agency, Centre for Ecology and Hydrology, Wallingford Hydrosolutions or any other organisation for the use of these data in the design or operational characteristics of any drainage scheme.
