Comments Details

| | |
|----------------------|--|
| Commenter Type: | Member of the Public |
| Stance: | Customer made comments neither objecting to or supporting the Planning Application |
| Reasons for comment: | <ul style="list-style-type: none">- Design- Privacy Light and Noise |
| Comments: | What is the proposed change to the southern elevation in respect of the existing garage door, although the proposed floor layout shows a wall constructed behind the garage door this is not mentioned in the design and appearance statement document section 5.2. If the door is to be left insitu and a false wall retained behind the current garage door - what sound insulation be implemented to make sure that any noise will not disturb current residents, especially with regards to any office machinery such as |

telephones/communication ringing out of office hours. Also what alarm systems may be installed for the security of the proposed office and will this be monitored to make sure that any alarm system is deactivated within a reasonable timeframe and will not disturb current residents in the locality of the office.

Kind regards

Telephone:
