Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Privacy Light and Noise
Comments:	The proposed development will mean many properties surrounding the site will see nothing from their windows other than a blank wall or part of the new structure. The majority of the properties have relatively small gardens meaning the new property will completely dominate our view. Our garden will be completely overlooked, meaning we have no privacy what so ever. Although the proposed height of the new property is only an additional 2 metres this will in fact almost double the height of the building. This will reduce natural light into many properties and in some cases including our, mean we have almost no sunlight in to our garden and will

struggle to see thr sky at all. With the addition of a residential property into a sometimes already noisy commercial environment the noise levels will only increase and will be outside normal working hours. The new property will also create more ambient light from security, parking and walkway lights that may be on during the night..

Kind regards
