Sirs/madams.

Ref DC/25/1312

The proposed use of Rusper Road at Ifield for construction traffic sets a dangerous precedent. The road is too narrow - indeed, when buses meet lorries and other buses, one of them has to mount the pedestrian pavement in order to make passing possible. Even the pedestrian pavement as it is now is too narrow, with grave risk to pedestrians from passing road traffic - especially from the likelihood of being hit by the extended side mirrors of goods vehicles.

The obvious route is Ifield Avenue and the proposed new road into the new neighbourhood. Please see to it that this is done.

Kind regards.
