I would like to a very strong objection to plans for the destruction of the wildlife ecosystem around Church Farm in Upper Beeding. The wildlife survey of 11th August is completely undermined by the fact that the field was unacceptably stripped of vegetation just one week before the survey. Much of the wildlife in the immediate area is protected and/or rare.

The effect of construction vehicles and more traffic on Church Lane which is little more than a track does not bare thinking about.

Yours sincerely,
