For the attention of Nicola Pettifer - Case Officer

The following attachments relate to my recent comments on the planning portal objecting to the planning proposal for the Triangle Field.

I attach 2 photos taken across the Triangle Field

The first taken in June 2023 and the second in June 2025, just as the new owner of the field started [REDACTED] clearing it. Both photos show a field rich in biodiversity and pollinating meadow flowers. This loss of pollinating flowers needs to be offset and compensated by the inclusion of larger wild areas within the plan where wild flowers can again flourish to offset this very significant loss of pollinators, which are important for the whole ecosystem of wildlife that thrives in this area. Please cross reference this with my bird recordings in the area, also submitted to this email address.
