May I add;

I'm just going to bed and in the process of heading upstairs I've seen half a dozen cars come through Bucks Green travelling at easily over 50mph. It's a daily occurrence.

I'd like to invite someone/s from planning or HDC or both to come and be roadside at least once to see what it's like. I think it's important you understand just how bad this situation is considering the data isn't getting that across. You can experience the small path width and a 50+mph car before any further decisions are made.

Let me know what dates work for you and I'll ensure I'm available.

Best wishes,

To whom it may concern,

I am staggered to hear that HDC are resisting the installation of a permanent speed camera on the A281 at Bucks Green. This dangerous section of road experiences massive speeding issues highlighted not only by data collected by the local Speed Watch Group and the Traffic Calming Group but also by permanent SID data collected over many years and Sussex Police's speed van operations and subsequent support.

The indication that HDC are actively avoiding addressing the speeding issues in the face of overwhelming evidence while also DOUBLING the number of homes in Bucks Green is almost unfathomable, particularly when the costs associated with installation would be covered by S106 funds.

Personally, given the circumstances I would expect HDC to be calling for average speed cameras in both directions as a minimum. It's a shameful display of the disinterest in public safety that we have experienced for years.
