Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Other - Privacy Light and Noise
Comments:	The planned extension will be visible from our conservatory, which we objected to when the plans were submitted previously. While we are prepared to accept this, we are concerned about the noise and disruption during a lengthy period while the work is being completed. The reason for this is that the house owner will complete the works himself and it will therefore take much longer than if an external company was employed. In discussion, we understand other trades will be brought in where needed. I work from home in an office situated at the back of the property

and am in frequent online meetings but also need quiet time to work. Additionally the resident of back bedroom would also be disturbed. The house owner has already spent many months working on their home and the noise has been difficult. During better weather, our time in the garden and in our conservatory, which is our dining room will also be affected. Parking spaces are very limited and the need for a skip reduces the spaces available to others as the owners have 3 vehicles. We realise these factors may be unavoidable but would ask for consideration in the length of time the works go on for. Please schedule the works and let us know the end date. Also we would not want to be disturbed at weekends, before 9am or after 5pm.

Kind regards
