HASCOMBE FARM – NEW STABLE BLOCK – SUPPLIMENTARY PLANNING STATEMENT

Further to the approval of application DC/22/0408 we are submitting this supplemental statement to record the following –

The use of the building will remain the same as the approved application, but we wish to amend the materials to reflect the new proposals as being brick and flint walling and a slate roof instead of the approved timber cladding and composite sheet roofing. This will match the other existing stable buildings on the farm and the recently completed judges building for events.

We would ask that this amendment be approved to the new stable block.
