Comments Details

Commenter Type:	Neighbour
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	- Design
Comments:	The extension design is in keeping with the house and compliments the architecture in our area. It clearly also adds depth to the rear of house which helps enhance privacy within the home. Privacy is a real issue for many in our estate. This type of proposal helps provide a sensible solution with no adverse effect to green areas. The construction type looks like a timber frame which generally is much quicker and greener to construct, so the build itself wouldn't cause much disruption.

Kind regards
