In addition to my previous objection, I would like to clarify that there is no evidence of a barn ever having been situated in either of the proposed positions for the barns and so claims of an existing footprint are unfounded and scurrilous. Historical Ordnance Survey Maps of 1896, 1879, 1911 and 1939 show no structures/barns. Similarly Yeakell and Gardener Map 1780 show no structures/barns. RAF Aerial Images of 1946, 1959 and 1947 show no structures/barns. Google Earth Maps of 2001 - 2025 also show no evidence of any structures/barns. The applicant has used the area to dispose of surplus building materials for the last ten years which cannot be confused as materials from a previous building or barn.

Kind regards
