Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Privacy Light and Noise
Comments:	The addition of "acoustic fencing" to the plan will have very little benefit. This type of fence is designed to counter traffic noise at close proximity, rather than dog barking across a large field. Moreover, the geography of the site means that the fence will be located lower than most of the field, rendering it even more ineffective as the sound will simply travel over it. Sound travels long distances over open country, we can hear train

horns from several miles away and I would expect dog barking to be no different.

Kind regards
