Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design
Comments:	If carried out, this development would look awkward and out of place as viewed by all the neighbours and people passing by. There are many houses in the area with attached garages and none of those garages have been altered in the way this application envisages. Understandably, that is because it would spoil the current balanced view where both garages are the same in design, width and height. Also, if agreed, the removal of the existing side door, being replaced with a wider garage door, would further detract from the original, and current nicely balanced view from the path and road at the front of the house.

Kind regards
