Dear Sir / Madam,

We are applying to revert our annexe, The Stables Home Farm, to ancillary living accommodation to Home Farm House. Due to the poor construction of the property by the previous owners it is moving and would no longer be possible to rent. The floor is now uneven and has become a trip hazard and depending on the amount of heave or subsidence the front or back door sometimes wedges shut so tightly it requires a shoulder barge to be opened. The cracks in the wall and floor are also a problem with pest access. Obviously, this would not be appropriate for rentals. As I do not have the funds to demolish and rebuild or underpin we have decided to use the property for family use such as housing friends and relatives when they come to stay and intend using it as a gym or storage for bikes. Whatever we decide it will be for family use only.
