1.0 Introduction

1.1 This Water Neutrality Statement (WNS) has been prepared on behalf of Reside Developments to demonstrate how the proposed development at Woodfords, Shipley Road, will achieve water neutrality.

1.2 Following the issue of Natural England's (NE's) Position Statement on Water Neutrality within the Sussex North Water Supply Zone (SNWSZ) it is understood that Horsham District Council require all new and reserved matters planning applications to demonstrate that the developments are water neutral and/or that they do not result in a significant effect. NE's Position Statement can be found in full within **Appendix A**.

1.3 The SNWSZ covers most of the Horsham District, as well as parts of the neighbouring Chichester, Arun and Crawley Districts. A plan showing the supply area can be found in **Appendix B**.

1.4 This statement sets out the following:

- Baseline calculations for the existing development;
- Additional demand as a result of the proposed development;
- Water reduction measures, such as water efficient fixtures and fittings and rainwater harvesting; and
- Measures to offset any remaining deficit following the above.

2.0 Background

2.1 The site is bordered to the north by residential development, to the west by Shipley Road, and to the east and south by open fields. The existing site consists of two fields, a house, swimming pool, a menage and stables, and a collection of outbuildings, which are bordered by trees, hedgerows and ditches.

2.2 The site proposals include the construction of 73 dwellings, comprising a mix of 1-bed, 2-bed, 3-bed and 4-bed homes, including three blocks of flats. An indicative schedule of accommodation can be found in **Appendix C** and a copy of the proposed site layout can be found in **Appendix D**.

2.3 The existing house on the site is to remain. However, the existing swimming pool, out-buildings, menage and stables will be removed.

3.0 Baseline Calculations

3.1 The existing open fields are currently used for grazing, with stables, other ancillary buildings and a swimming pool associated with the existing house onsite.

3.2 There are currently 4 horses using the existing stables on site and it is estimated that they drink between 25-55 litres per day, depending on the time of year. Therefore, an average of 40 litres per horse per day has been used to calculate the daily water use, which equates to 160 litres per day. This does not include any allowance for water use associated with any washing down of the stables and the yard.

3.3 The existing outdoor swimming pool will use water throughout the year to maintain water levels and backwashing of filters. It is estimated that on average this equates to 66 litres per day.

3.4 Therefore, it is estimated that the existing water use for the site is 226 litres per day.

3.5 However, using a precautionary approach to assessment, this has not been carried forward in the calculations and the baseline will be taken as zero.

4.0 Onsite Proposals

Additional Demand

4.1 Part G of the Building Regulations recommends that all developments achieve a water consumption of 125 litres per person per day.

4.2 The average occupancy levels for each dwelling size have been based on local census data (agreed by Horsham District Council) and it is summarised in Table 4.1 below.

1-bedroom	2-bedroom	3-bedroom	4-bedroom
1.32	1.88	2.47	2.86

Table 4.1 – Occupancy level per dwelling size

4.3 Using the above census data, the population of the proposed development is estimated to be 163.62.

4.4 Using Building Regulations water consumption figure of 125 litres per person per day and population size of 163.62 it is estimated that the total water usage per day for the proposed development would be 20,452.50 litres per day (125x163.62).

4.5 Therefore, following the construction of the proposed development there would be an increase in water demand of 20,452.50 litres per day.

Water Reduction Measures

4.6 To minimise the water use of the development water efficient fixtures and fittings will be incorporated, which will reduce water consumption to less than is required by Building Regulations (limit of 125 litres per person per day).

4.7 A water calculation in accordance with Building Regulations Part G has been carried out and confirms that the proposed development will achieve a water consumption rate of 76.33 litres per person per day, which includes an allowance of 5 litres per person per day for external water usage. A copy of the Part G calculation can be found in **Appendix E**.

4.8 The following table sets out the water uses, as detailed in the Part G calculation.

	Total Water Usage (l/p/day)
WC (full flush)	5.84
WC (part flush)	5.92
Taps (Excluding Kitchen)	5.85
Bath	14.30
Shower	21.85
Kitchen Taps	12.12
Washing Machine	10.31
Dishwasher	2.20
Total	78.38
Normalisation Factor	0.91
Total	71.33
External Water Use	5.00
Total	76.33

Table 4.2 – Water Usage

4.9 A copy of the proposed fixtures and fittings to achieve the above water consumption can be found in **Appendix F**.

4.10 Using the Part G water consumption figure of 76.33 litres per person per day and a population size of 163.62 it is estimated that the total water usage per day for the proposed development would be reduced to 12,489.12 litres per day (163.62x76.33).

4.11 To ensure the development can demonstrate water neutrality in accordance with the NE Position Statement 12,489.12 litres per day will need to be offset

5.0 Offsite Offsetting Measures

5.1 Reside Developments are proposing to offset the development against an offsetting scheme at Woodsomes Farm and the Brickworks, Lynwick Street, Rudgwick, Horsham, RH12 3DL. This is located within the SNWSZ, see extract below from the SNWSZ map showing the approximate location and the full SNWSZ map can be found in **Appendix B**.

Figure 5.1 – Farm Location on SNWSZ Map

5.2 Woodsomes Farm and the Brickworks are to swap their current Southern Water connection point to a new Thames Water connection point to supply all onsite water. This will then give an allowance of mains water from within the SNWSZ that can be sold as part of an offsetting scheme.

Offsetting Scheme Summary

5.3 The offsetting scheme site is currently on a Southern Water metered mains supply. There are a number of meters onsite, one meter provides a supply for the farm (meter number: 09418884) and two meters provide a supply to the Brickworks (meter numbers: 89012753 and 97PB406145).

Farm Demand

5.4 According to the Defra Report WU0132 Sustainable Water for Livestock it is estimated that the water use of dairy cows and calves are as follows:

Animal	Drinking Water Requirements (litres per day)
Dairy Cow – Lactating	104.5
Dairy Cow – Dry Period	20
Heifer	20
Calves	10

Table 5.1 – Drinking Water Requirements for Cows

5.5 During the year the dairy cows will be lactating for 330 days and then they will be dry for 35 days.

5.6 The following table sets out the average stock number at the farm from 2008 to 2023. A copy of the full stock numbers can be found in **Appendix G**.

Animals	Average stock (per year)
Cows	228
Heifers	74
Calves	73
Bulls	1
Total	375

Table 5.2 – Average Stock Numbers

5.7 Table 5.2 above shows that overall stock numbers have remained relatively constant over the past 16 years. Using a precautionary approach, the average number of animals have been used in the calculations and Bulls have not been included in the calculation. Using the water usage requirements set out in Table 5.1 and the average stock numbers in Table 5.2, this equates to a daily water consumption of 24,155.73 litres per day. A copy of the water usage calculation can be found in **Appendix H**.

5.8 As can be seen from the recent bill from Southern Water, the farm is currently connected to the Southern Water network, see **Appendix I**. The farm has been in communication with Southern Water regarding their water meter, following its failure. This has taken the farm some time to rectify with Southern Water, however, a new meter has now been installed, but due to there being no ability to undertake meter readings over the last two years, the recent water bill for the farm is only an estimate. It therefore does not reflect the true water use of Woodsomes Farm. It should be noted that a similar situation occurred with the Dedisham Farm water neutrality scheme, where there were also problems with the Southern Water meter and the farm's own onsite meter and readings was used and accepted.

5.9 Woodsomes Farm, as part of their process of reestablishing their billing process with Southern Water, have been taking meter readings of meter reference 09418884. This can be seen for the period of the 27th December 2023 to 17th June 2024 in **Appendix J**. All evidence for the meter readings can be seen in **Appendix K**.

5.10 This clearly shows that the Farm has an average water consumption of 20,254 litres per day and demonstrates the volume of water being used by Woodsomes Farm. In addition, it can be seen to be realistic figure for this farm, when compared to the Defra Report WU0132 Sustainable Water for Livestock, which predicts a slightly higher usage.

5.11 Additional meter readings of meter reference 09418884 have been taken, from the 12th September 2024 to 24th March 2025, and can be seen in **Appendix L**. All evidence for the meter readings can be seen in **Appendix M**. These meter readings show an average water consumption of 21,254 litres per day and confirms that the farm has fairly consistent water usage. A precautionary principle will be taken towards the meter readings for Woodsomes Farm, therefore the lower water usage of 20,254 litres per day will be taken forward in the WNS.

Brickworks Demand - Commercial

5.12 The Brickworks site, located next to the farm, has two Southern Water meters. One of the meters was replaced in 2023, therefore the data has been split into Brickworks 2A (meter prior to 2023) and Brickworks 2B (new 2023 meter). The site is made up of several commercial units, including a coffee shop. Table 5.3 below shows a summary of the readings for each meter and the full calculations can be found in **Appendix N**. A copy of the water bills can be found in **Appendix O** and all other evidence for the meter readings can be seen in **Appendix P**.

	Brickworks 1	Brickworks 2A	Brickworks 2B
Start Date	03/11/2020	25/10/2018	04/04/2023
End Date	09/04/2024	04/10/2022	09/04/2024
Start Meter Read	616m^3	428m^3	132m^3
End Meter-Read	2148m^3	9216m^3	2529m^3
Total Days	1253	1440	371
Total Water Consumption (m^3)	1,532	8,788	2,397
Total Water Consumption (Litres)	1,532,000	8,788,000	2,397,000
Water Consumption (Litres per day)	1,222.67	6,176.15	

Table 5.3 – Existing Water Use at the Brickworks

5.13 This shows the Brickworks has a total daily water consumption of 7,398.82 litre per day.

5.14 Additional meter readings for Brickworks 1 and Brickworks 2B meters were taken, this can be seen in **Appendix Q**. A copy of the water bills can be found in **Appendix R** and all other evidence for the meter readings can be seen in **Appendix S**. This shows an average water consumption of 7,582.63 litres per day. A precautionary principle will be taken towards the meter readings for Brickworks, therefore the lower water usage of 7,398.82 litres per day will be taken forward in the WNS.

Total Existing Demand

5.15 Overall, the farm has an average daily water consumption of 20,254 litres per day and the Brickworks has a daily water consumption of 7,398.82 litres per day. In total the mains water demand is 27,652.82 litres per day, which will be supplied by Thames Water. A meter will be installed for the new Thames Water supply and meter readings will be submitted to Horsham District Council every six months for the first two years, and thereafter annually.

5.16 Thames Water has confirmed the installation of a water connection to the site. Confirmation of the connection can be seen in **Appendix T**.

5.17 This confirmation that Woodsomes Farm and the Brickworks will no longer draw mains water from the SNWSZ, this means that 27,652.82 litres per day is available for offsetting, equating to 27,652 credits.

5.18 In addition to the new Thames Water supply and water meter, the current Southern Water meters will be cut off, but will remain in situ. There will be an air break in the pipe connecting to the Southern Water meter and network to ensure no water can enter the Woodsomes Farm's and the Brickworks' water network, but also to ensure there is no cross-contamination between Southern Water and Thames Water.

5.19 As the Southern Water network will be essentially disconnected from the Woodsomes Farm and the Brickworks network, and monitoring of the remaining Southern Water meters will ensure it is clear that no water is being used. Again, readings of the remaining Southern Water meters will be submitted to Horsham District Council every six months for the first two years, and thereafter annually.

6.0 Woodfords Offsetting Measures

6.1 To ensure the development can demonstrate water neutrality in accordance with the NE Position Statement 12,489.12 litres per day will need to be offset.

6.2 The number of credits required for this application is set out in the water budget table 6.1 below. One credit is equivalent to 1 litre per day. The table below lists the developers participating in this scheme and their allocation.

6.3 The offsetting scheme is making up to 27,652.82 litres per day available for offsetting mains water demand, which equates to 27,652 credits.

6.4 As stated in Section 4 of this WNS, the proposed development will have a total water demand of 12,489.12 litres per day and therefore require a minimum of 12,490 credits for the development to be water neutral.

Developer	Planning Reference (if available)	Credits
Starting water use/credits	N/A	27,652
Reside Developments - Southwater		12,490
	Total Currently Allocated	12,490
	Remaining Credits (Surplus)	15,162

Table 6.1 – Water Budget

7.0 Summary and Conclusions

7.1 This Technical Note sets out the water usage strategy for the proposed development at Shipley Road, Southwater.

7.2 The proposal is to incorporate on-site water efficient fixtures and fittings on the proposed development to reduce water use as far as practicable.

7.3 The proposed development at Southwater will purchase and be allocated 12,490 credits as part of the significant mains water offsetting scheme at Woodsomes Farm. Therefore, the residual mains water requirement of the development of 12,489.12 litres per day has been fully offset and there is no additional mains water requirement within the SNWSZ as a result of the development at Woodfords, Shipley Road, Southwater.

7.4 This strategy will ensure that the new development will have a neutral impact on the Sussex North Water Supply Zone. The Water Usage Strategy confirms the proposals will be water neutral once complete, and thus satisfies Natural England's' Requirements.

Appendix A

Natural England's Position Statement

Natural England's Position Statement for Applications within the Sussex North Water Supply Zone

September 2021 – Interim Approach

Please take the following as Natural England's substantive advice for all applications which fall within Sussex North's Water Supply Zone.

Sussex North Water Supply Zone

Arun Valley SPA, SAC and Ramsar Site- Sussex North Water Supply Zone

The Sussex North Water Supply Zone includes supplies from a groundwater abstraction which cannot, with certainty, conclude no adverse effect on the integrity of;

- Arun Valley Special Area Conservation (SAC)
- Arun Valley Special Protection Area (SPA)
- Arun Valley Ramsar Site.

As it cannot be concluded that the existing abstraction within Sussex North Water Supply Zone is not having an impact on the Arun Valley site, we advise that developments within this zone must not add to this impact. This is required by recent caselaw, Case C-323/17 People over wind and Sweetman. Ruling of CJEU (often referred to as sweetman II) and Coöperatie Mobilisation for the Environment and Vereniging Leefmilieu Case C-293/17 (often referred to as the Dutch Nitrogen cases).

Between them these cases require Plans and Projects affecting sites where an existing adverse effect is known (i.e. the site is failing its conservation objectives), to demonstrate certainty that they will not contribute further to the existing adverse effect or go through to the latter stages of the Regulations (no alternatives IROPI etc).

Developments within Sussex North must therefore must not add to this impact and one way of achieving this is to demonstrate water neutrality.

In addition, the Gatwick Sub regional Water Cycle Study concluded that water neutrality is required for Sussex North to enable sufficient water to be available to the region.

The definition of water neutrality is the use of water in the supply area before the development is the same or lower after the development is in place.

Strategic approach

Natural England has advised that this matter should be resolved in partnership through Local Plans across the affected authorities, where policy and assessment can be agreed and secured to ensure water use is offset for all new developments within Sussex North. To achieve this Natural England is working in partnership with all the relevant authorities to secure water neutrality collectively through a water neutrality strategy.

Whilst the strategy is evolving, Natural England advises that decisions on planning applications should await its completion. However, if there are applications which a planning authority deems critical to proceed in the absence of the strategy, then Natural England advises that any application needs to demonstrate water neutrality. We have provided the following agreed interim approach for demonstrating water neutrality;

Minimising water use of new builds.

- Complete a water budget (based on occupancy)
- All new builds to demonstrate that they can achieve strict water targets (e.g., 85L/pp/day*)

  This can be achieved by measures such as:

- Grey water recycling (advantage of being reliable in hot dry weather);
- Rainwater harvesting;
- Water efficient fixings (such as shower aerators) to demonstrably reduce demand-this would need to be suitably certain.

In addition, water offsetting is required

- One way to achieve this is retrofitting of council owned properties/commercial buildings-located within Sussex North. Examples include:

- Grey water recycling- (for example there are clear opportunities for commercial properties).
- Rainwater harvesting of commercial settings;
- Installation of water reduction fittings in Council-owned buildings.

These measures need to be implemented until such time as a more sustainable water supply has been secured.

It will also need to be ensured that measures are not already proposed (for example in Southern Water's Management Plan) to avoid double-counting.

Any mitigation must be suitably certain in order to comply with the Habitats Regulations and Caselaw.

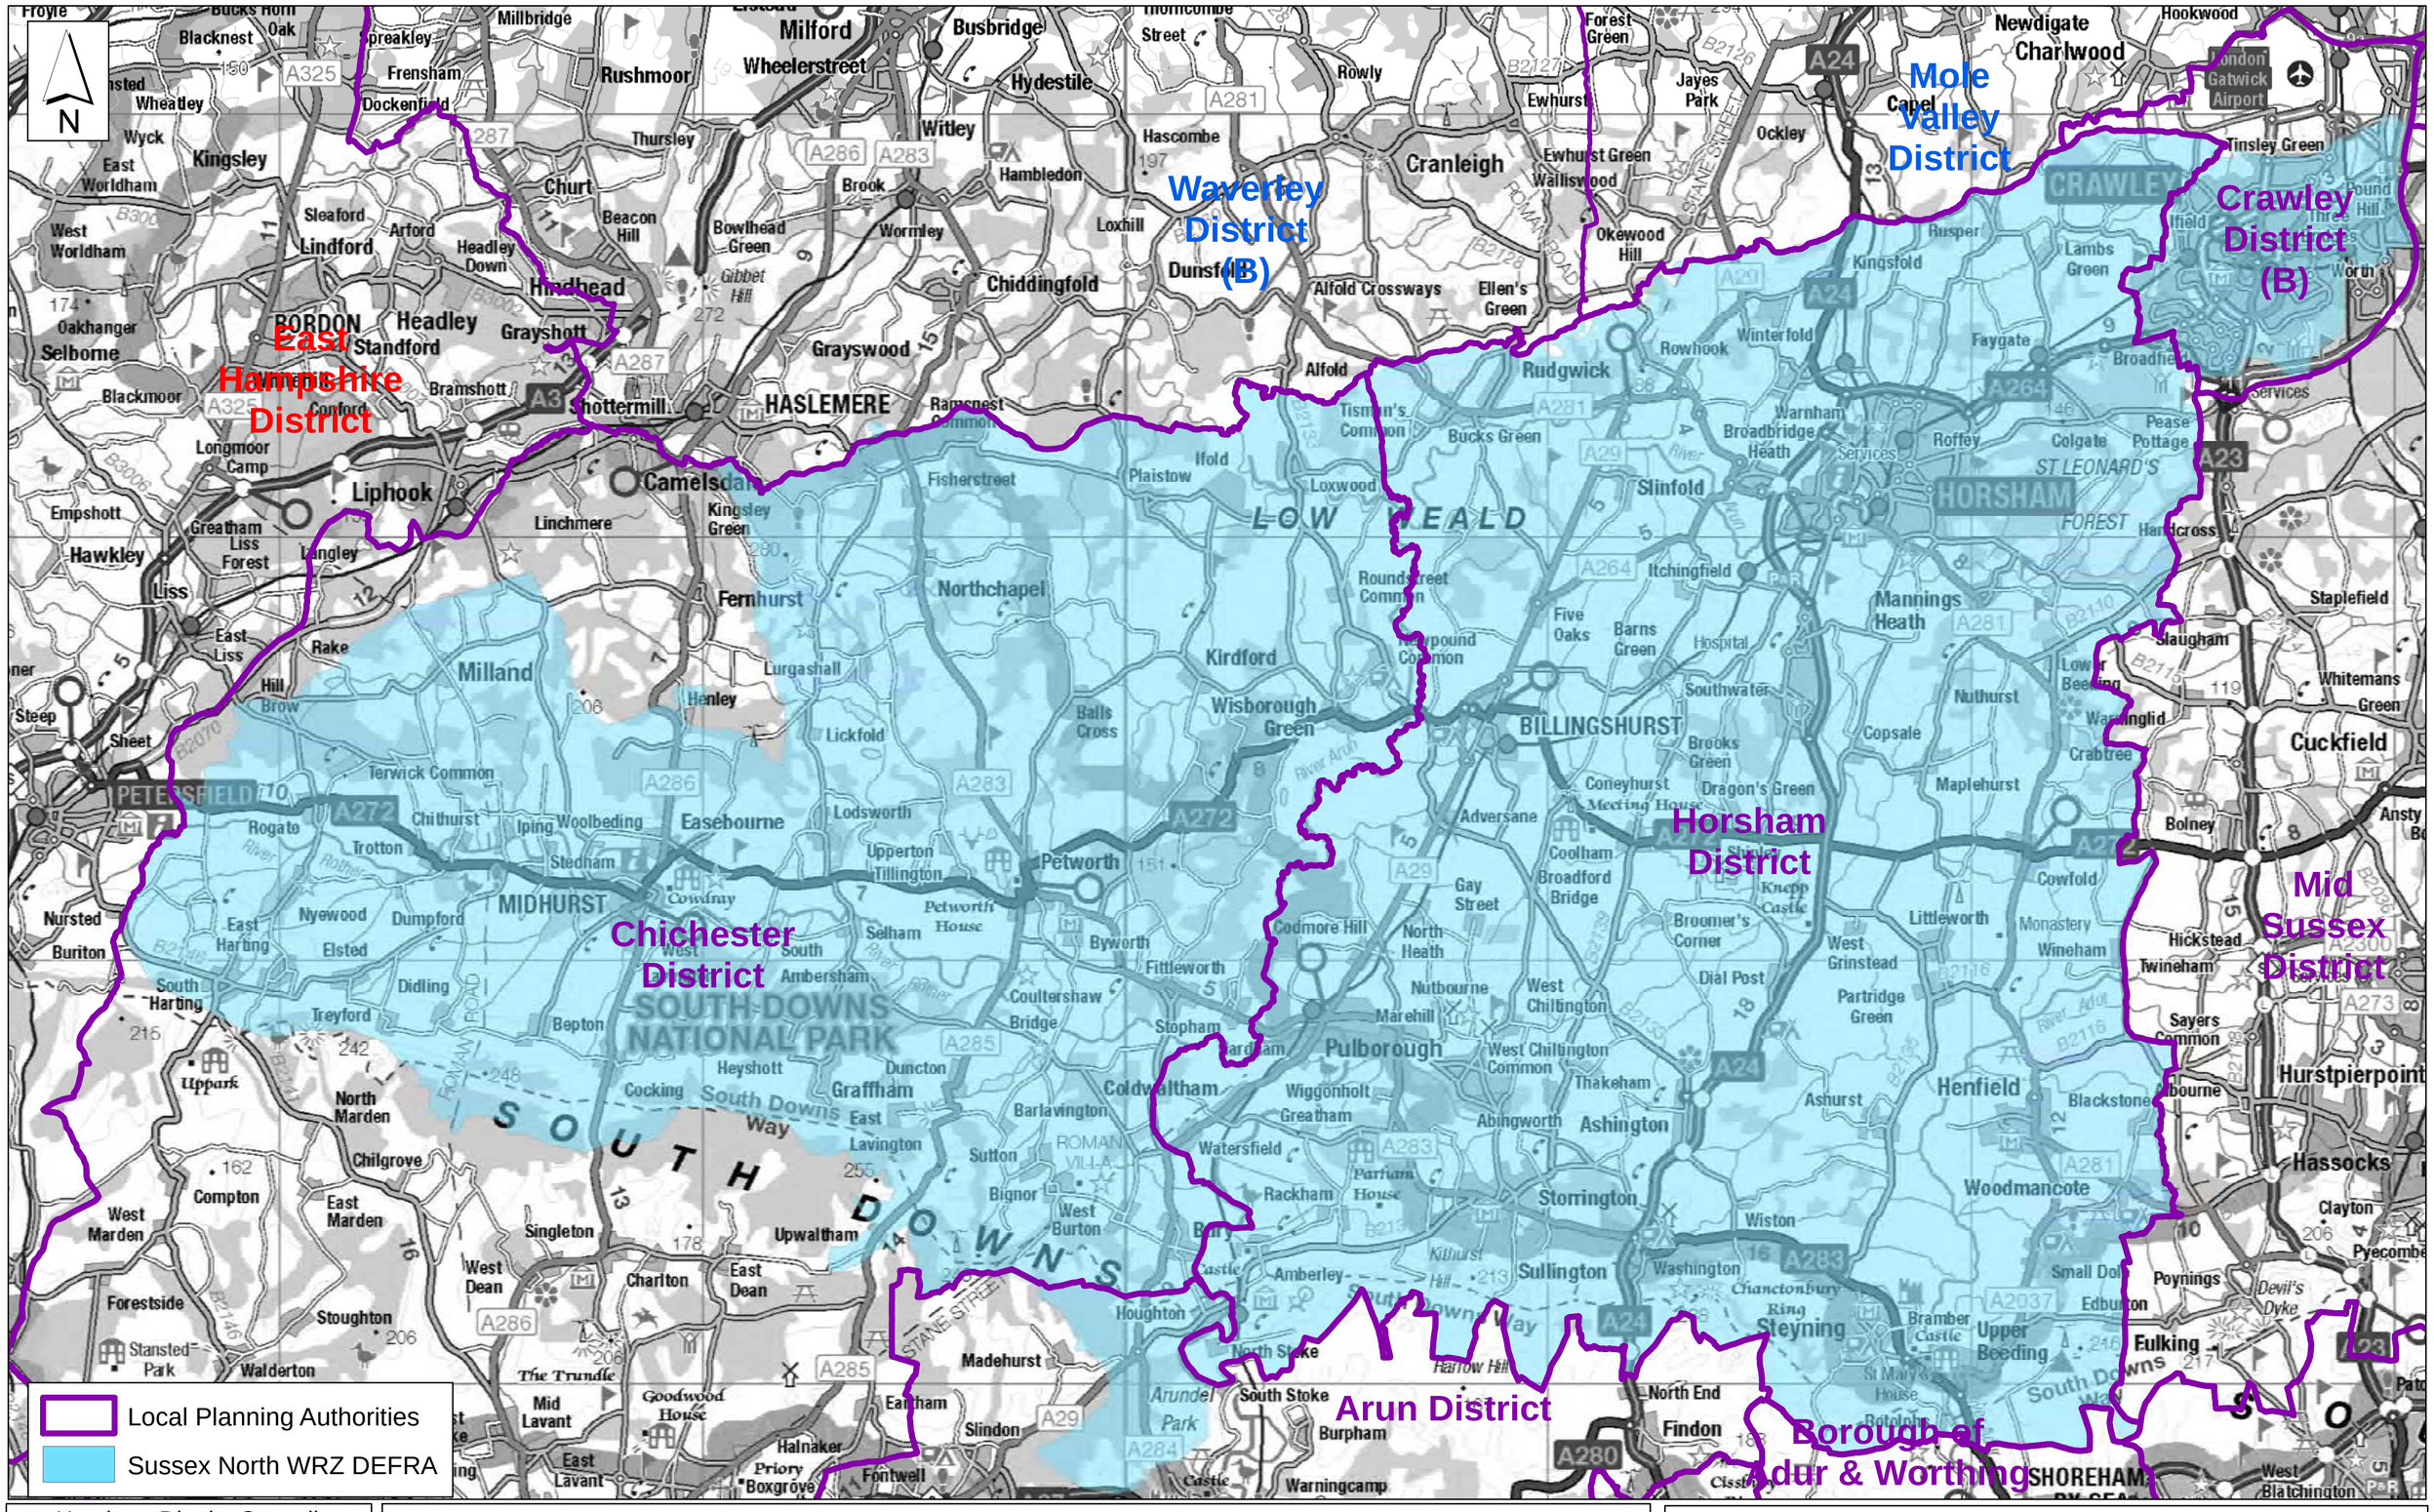

If the application cannot demonstrate, through an appropriate assessment, the required water neutrality, we advise that it is either revised to achieve this in line with the above or awaits completion of the strategic approach.

The securing of water neutrality is a matter which needs to be resolved at a strategic level and Natural England is working with the relevant authorities and the water company to achieve this. In light of this, Natural England will not be engaging with individual planning applications whilst the strategy is evolving.

***This this is the reasonably achievable figure with the above measures based on the early data from the strategic solution and may be subject to change as the strategic solution evolves.**

Amount to pay now	**£16,063.84**

How you can pay

You can pay your bill in many different ways – please choose the one that suits you best.
Your payment reference number is **1213 0170 00018**.

Direct Debit

If you'd like to pay by Direct Debit, you can set one up at **southernwater.co.uk/paying-your-bill.**

Debit and credit card

You can pay by card on our website at **southernwater.co.uk/paying-your-bill** or by phoning **0330 303 1263** (24 hours 7 days a week).

Online or telephone banking

When paying online or by telephone banking, quote your payment reference number on the front of your bill. Our bank sort code is **40 02 50** and account number is **91426907.**

At a bank or post office

You can pay at most banks or post offices using the payment slip over the page. This service is free if you pay at a post office, any HSBC branch or your own bank (except Santander or Halifax).

By post

Complete the payment slip over the page and write a cheque made payable to Southern Water. Then post them together to Southern Water Services, PO Box 564, Darlington, DL1 9ZG.

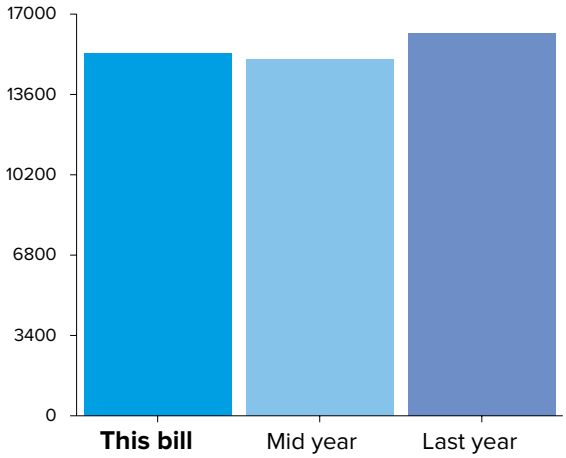

PayPoint

You can pay by cash wherever you see the PayPoint sign. Please take your bill or your payment card with you.

Your water use

Over the last two months your household used an average of 15346 litres a day

You're using £30.75 of water a day on average.

We noticed your water use has increased by 258 litres of water a day on average.

If you use less water, you'll save money on your bill. Find out how you could reduce your usage here:

southernwater.co.uk/save-water

Your water meter is read twice a year. We can read most meters from the street – so you may not have noticed when we read yours.

You can find more information on our charges and ways to save water and money on our website.

Visit business-stream.co.uk

How much water are you using?

If you'd like to reduce the volume of water you're using, check out our water saving tips on page 4. You'll also be able to find advice on our website business-stream.co.uk Please note, your usage may be based on estimated readings.

Estimated invoice

This invoice is based on an estimated read. If we receive an actual read, we will use it to calculate your next bill. You can submit your own readings, as long as it's safe to access your meter, on business-stream.co.uk/meter-reading. If your water is not provided by us, we will receive reads from your other supplier.

The water experts

Unless otherwise agreed, Scottish Water Business Stream Ltd provides services to you in accordance with our standard terms and conditions, a copy of which is available here: www.business-stream.co.uk/EnglandWalesTerms. Copies are also available on request. Through your continued receipt and acceptance of our services, you are deemed to have accepted our standard terms and conditions.

This is a fee for the upkeep of external pipes and pumps that remove waste water from your premises.

This is the amount of water that we estimate goes down your drain based on a proportion of the water consumption recorded by your water meter. In general, waste water is charged between 95% and 100% of your recorded water use.

This is a fee for the collection of rainwater which runs into the public sewerage system from your premises.

This is a fee for the upkeep of the public roads drainage system and road flooding.

Clean Water

Site address: **Park Farm, Baynards Lane, Horsham, RH12 3AB**

New water connection quote

Your details:

Name: Harrison Rural Partners
Address: LYNWICK STREET
Email: tim@pallinghurstfarm.co.uk
Phone:

DS Reference: DS2032403
Quote Number: 20134135
Date: 04 April 2024

Work description: Existing Commercial Separation of shared - 1x32mm MDPE Commercial metered supply

Your quote is valid for 6 months and will expire on 01 October 2024 ('the expiry date')

Summary of charges

	Charge ex VAT(£)	VAT (£)	Charge inc VAT(£)
Excavation & connection charges	**1,600.00**	**320.00**	**1,920.00**
Infrastructure charges These cover the extra demands which new connections put on existing water mains, sewers and other infrastructure (this also includes Infrastructure credits, if any)	0.00	0.00	0.00
Environment Discount on Infrastructure charges	0.00	0.00	0.00
Net Infrastructure charges	**0.00**	**0.00**	**0.00**
Network charges These cover the extra demands which new connections put on existing water mains, sewers and other infrastructure	885.00	0.00	885.00
Net Network charges	**885.00**	**0.00**	**885.00**
Total balance due	**2,485.00**	**320.00**	**2,805.00**

Detailed breakdown of charges

The tables below explain which works must be completed by Thames Water and which works you can employ a self-lay provider to complete. For more details on self-lay and to find a provider visit https://www.lrqa.com/en/utilities/water-industry-registration-scheme-wirs-wirsae/search/
This section shows how the total balance due was calculated.

Work that may be completed by Thames Water or a self-lay provider	Qty	Unit rate (£)	VAT rate (%)	Charge ex VAT (£)	VAT(£)	Charge inc VAT (£)
32mm MDPE Single Connection in Unmade	1.00	1,370.00	20.00	1,370.00	274.00	1,644.00
32mm MDPE pipe-lay in Unmade (per M)	1.00	230.00	20.00	230.00	46.00	276.00
			Sub-total	1,600.00	320.00	1,920.00

These elements of the work could be done by a self-lay provider instead of us, should you choose to use one. For more details on self-lay, visit http://www.lr.org/wirs

Total balance due	2,485.00	320.00	2,805.00

Validity

This quote was created in accordance with our current Charging Arrangements, which are updated on 1 April every year. To see our latest charges https://www.thameswater.co.uk/developers/charges

A requote will be required if:

- You have not laid your supply pipe and passed your water regulations inspection within 12 months from the quote date
- Your quote passes its expiry date
- Your requirements change

The requote will be calculated using the Charging Arrangements in place at the time we process your requote. If your quote includes an Environmental Discount on your Infrastructure Charges, your development may be subject to an audit to ensure the criteria for the Environmental Discount is satisfied. If your development does not satisfy the criteria for the Environmental Discount, you will not be entitled to benefit from the Environmental Discount and you will be liable to pay the Infrastructure Charges in full.

Terms and conditions

1 This quote has been produced in line with our charging arrangements. These can be found at https://www.thameswater.co.uk/developers/charges

2 This quote is valid for 180 calender days. After this time you will need to apply for a requote (for which charges apply).

3 When you've accepted and paid for your quote, you must lay all of the supply pipe(s) and pass all your water regulations inspection(s) within 12 months from the date of the quote. If you have not laid your supply pipe(s) and passed all your water regulations inspection(s) within the 12-month time period, you will require a requote. A requote fee will be payable, and your requote will be calculated using the charging arrangements applicable at the time we process the requote.

4 If your quote includes an Environmental Discount on your Infrastructure Charges, by accepting this quote you are consenting to us carrying out an audit of your development to ensure the criteria for the Environmental Discount, you will not be entitled to benefit from the Environmental Discount and you will be liable to pay the infrastructure Charges in full.

5 You must comply with the conditions of connection specified within these terms and conditions.

6 This quote has been calculated based on the information available to us, including the information you provided as part of your application for a Service Connection. In the event that the information you provided was incorrect or your requirements change, you will need to ask for a requote (for which charges apply) before we make the connection.

7 If you request a change to the design once we are on-site, you will be asked to sign a variation order to confirm you will pay the cost of the changes based on our fixed price charges applicable at the date of the works, or we will cancel the job and ask you to obtain a requote. Abortive charges and charges for additional site visits are not included in our quote and will increase the cost of your Service Connection where applicable.

8 Your payment options are set out in our Charging Arrangements. As detailed therein you can pay in advance or on completion of the Service Connection. If you pay in advance, you will be charged using the rates in effect on the day we issued our quotation. If you pay on completion of each connection, you will be charged using the rates in effect on the day we complete our works, which could be different from the charges detailed in this quotation. In order to pay on completion, you will need to provide us with an acceptable form of security before we carry out any work. The security will be equal to the expected total value of the charges for your new service connection(s). Details of the security we accept can be found in our Charging Arrangements.

9 We do not accept conditions which may be contained in your own order forms or other documents, and which are not consistent with these conditions.

10 Unless otherwise agreed in writing by us, a separate service pipe must be provided for each house or building and for each part of a building that is separately occupied.

11 We will only lay the portion of the service pipe from the water main in the public land to the boundary of your property and it is your responsibility to provide and pay for the portion of the service pipe from the boundary of your property up to and into your property. Should the boundary of your property and that of the public land be separated by private land owned by a third party it is your responsibility to obtain permission from the landowner of that land and to lay the portion of service pipe in that land.

12 If you have not provided the plot to postal information already, you must provide this information at your earliest convenience. We are entitled to delay the new connection until you provide such information.

13 The plumbing installations, both internally and externally within the boundary of your property, must be in such a condition as to allow the fitting of a water meter. We will visit the site to verify these requirements for all external pipe work installations and a random sample of intern al pipe work installations. You must ensure that external pipe work is uncovered for this inspection before any connection can be carried out by us.

14 We require a minimum of five working days' notice to enable us to schedule the appropriate water regulations inspections. You must pass the Water Regulations inspection before any connection to our water main can be made. If you fail the Water Regulations inspection you must correct any faults identified in the inspection and ask us to make a re-inspection of the relevant pipework (additional visit charges apply). If you use a WaterSafe or Thames Water approved plumber /contractor, we will not need to inspect the external underground pipework providing that a certificate of compliance (which they should provide you with) is sent to us.

15 Every service pipe connecting your property to our water main must be metered. The meter reading will be used by us to determine the charges we raise for water and sewerage services for your property.

16 In situations where your property contains parts that are separately occupied but are not individually served by a separate service pipe, (if agreed by us under clause 10 above) each separately occupied part of your property must also be metered. The meter will be used by us to determine the charges we raise for water and sewerage services.

17 If we are installing a meter, we will install it on the part of the service pipe that we lay in the street and as near as practicable to the boundary of your property. If for any reason the meter cannot be satisfactorily located underground in that position, you agree to us installing the meter on the part of the service pipe which you lay and which will be within the boundary of your property. Whilst we will try to fit the meter externally, if this is not practicable we will fit the meter inside your property. The need for us to install a meter within the boundary of your property may only become apparent after we have started work on the street. Any meter installed on a service pipe externally must be fitted by Thames Water or a self-lay provider. Any meters that are fitted internally, must be fitted by you or your contractor and you must obtain these through Thames Water. If the meter is being fitted by you or your contractor, you must adhere to our Water meter installation policy for property developers', which you can find at https://www.thameswater.co.uk/developers/larger-scale-developments/clean-water/metering. Any non-approved Thames Water meters installed maybe rectified at your cost.

18 Where more than one service pipe is laid by the point of connection, the pipes must be suitably spaced to facilitate ease of connection. Where a manifold is being used, the pipes for those supplies should come out to the edge of the boundary together. Where two pipes are laid in the same trench, the pipes must be spaced no more than 50cm apart. Each pipe must also be tagged to indicate which unit or dwelling it serves.

19 Where new supplies are laid on new sites before completion of the roads:

i) You must take all reasonable steps to safeguard our apparatus against damage. You will be responsible for the cost of repair or replacement of any of our apparatus found damaged on site.

ii) Your meter boxes will be placed in position as accurately as is practical at the time of installation. You will keep these boxes clear of obstruction and adjust to suit finished levels. It must be considered that the meter boxes are integral, and only minimal vertical adjustment is possible. There is no provision for lateral adjustment.

iii) Ducts laid by you under new roads should be a minimum 100mm diameter UPVC, MDPE or salt glazed pipes only, and laid between 0.75m and 1.35m (to the crown of the pipe) below finished road level. The line of the duct must be clearly marked on the curb at each side for ease of identification. If we cannot find the ducts, you will be charged for any extra work we have to do.

20 If the quote includes connections for building supplies, you must contact us to disconnect this supply once you have used it for building works. If you want to convert the building supply connection into a permanent connection, you must contact us to arrange for the connection to be inspected. You must not use the connection as a permanent supply until all required inspection approvals have be granted by us and all additional charges, including but not limited to inspection and infrastructure charges have been paid.

21 This quote does not confirm capacity exists in the existing network for your development and cannot be used to discharge any water capacity planning conditions imposed by the local planning authority on your development. To check if capacity exists for your site, visit our planning your development page on our website https://www.thameswater.co.uk/developers/larger-scale-developments/planning-your-development/water-and-wastewater-capacity You can use this quote as evidence to support a planning application and we can prepare to serve the new development at the point of need, to help avoid any delays to your programme.

SITE LOCATION:	Park Farm, Baynards Lane, Horsham RH12 3AB

Thames Water Point of Entry Plan - Not To Scale

Plot(s) and Connection Objects (CO)

Plot 1-: 1x32mm MDPE Commercial metered supply off 4" AC Offsite

Existing Commercial Separation of shared

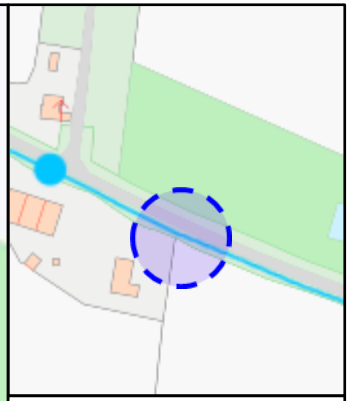

The Commercial supply is for: Agricultural trough(s)

CO: 7681423

Connection in – Cox Green Road

Please ensure that you have a copy of this plan when you are booking your water regulations and on site during the inspections. This will enable us to confirm with you the correct plot to be inspected.

Note: The position of the apparatus shown on this plan is believed to be correct at time of issuing this drawing. Thames Water accepts no responsibility in the event of any inaccuracy. The actual position of our apparatus, including existing service pipes which are not displayed on this plan must be established on site.

The proposed point of entry for the new service connections maybe subject to deviation due to unforeseen obstructions. Any variation from the designed position of the new water service connections may incur additional charges.
