Categories: Landscape/Heritage/Trees

Good Morning [redacted]
Thanks for your message. The proposed work is very similar to what was done previously. The height will not be affected nor will the neighbours aspect except to blend it in with the owners side around their boundary whilst maintaining as natural shape as possible. Overall the aim of the work is to again reduce the encroachment of the tree on the house, garage and out building and garden and to allow a bit more light in.
The Crown will be raised to where it was previously at approximately 4.5m all around and the overall diameter of the spread of the tree from the boundary hedge and trunk will be approximately 7m. I hope that's all clear for you but if you need any more information please get in touch.
Kind Regards,
Philip Miles
