Dear Peter,

Ref: 25221 – Agricultural Barn at Stoneleigh.

We acknowledge receipt of your recent emails in connection with conversion of the agricultural building for residential purposes. We have been issued with a copy of the calculations and a construction drawing which were prepared by JC Structures. We also acknowledge receipt with thanks of the Building Control Final Certificate confirming that the structure was built in accordance with Building Regulations and the design details.

We note that the floor is reinforced concrete on insulation and compacted hardcore so we believe this will be suitable to be retained for the purposes of the conversion.

In the knowledge that the agricultural building was constructed in accordance with the Building Regulations, we are of the opinion that it will be suitable for conversion for habitable purposes without significant alterations or modification.

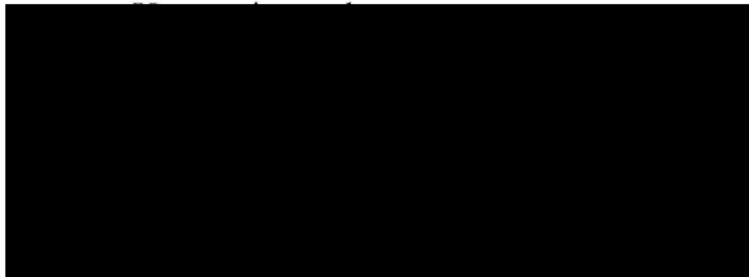

We trust this brief report is sufficient for your present purposes but if you have any questions at this stage then please do not hesitate to call. We would be delighted to prepare full structural calculations and details in due course to accompany your Building Regulation Application.
