REASONS FOR PROPOSED TREE WORK

T1 *Sequoiadendron giganteum* in the rear garden of 5 Cleve Way Billingshurst RH14 9RW – possibly within TPO/0721

- Sectional fell
- Leave a low stump

The tree is in decline with minimal functioning needle growth present – please see the photo below
With the species of tree being unable to produce new growth from bare wood, the prognosis for the tree is poor with further decline inevitable – the reason for the decline is unclear
There is no scope to replant
