Hiya - further to email from [REDACTED], I am sending in my objection to the above planning application due to the system error I keep receiving on the website.

[REDACTED]
18 Massey Close, Thakeham, RH20 3GZ

Objection -

Design - the most recent plans include houses that back directly onto my property, without sufficient drainage or space being considered. This will have a negative impact on myself and my neighbours gardens.

Highway access and parking - the roads are already over populated for this little village, with massive lorries regularly using our small roads. There is also not sufficient parking outlined on the plan for each home so these cars will likely have to park in other areas.

Overdevelopment - as above, already too many people within this small village with not enough infrastructure to support things like suitable water drainage, waste water systems, parking, shops and road use.

Privacy - the new homes back directly onto my garden, losing the privacy I have for my garden space. The noise from the development will be unbearable and will affect my wellbeing whilst being built. Once built, there will likely be 450 people living behind me which will be loud either from their cars driving around or them being in their gardens creating noise.

Other: I am concerned about the asbestos within the buildings which will be dispersed when being knocked down, I am also concerned about the damage then may happen during the building whether this may be dust all over my home, windows, cars which I will have to pay extra to clean but also lorries using the roads and dropping materials which may damage our cars. I am also concerned about the bats living within the mushroom farm which Bellway have said they will relocate, how will they do this without harming them during demolition?

Thank you
