Comments Details

Commenter Type:	Neighbour
Stance:	Customer made comments neither objecting to or supporting the Planning Application
Reasons for comment:	- Other - Privacy Light and Noise
Comments:	I would like to register the comments below with regards to these applications, and although I don't in principle object to the conversion, I sincerely hope that some conditions could be attached to the permission to mitigate both mine and my neighbour's concerns. My property is attached to the proposed kitchen and the roof

space is attached to my bedroom and I suspect with little, if any, fire and sound insulation.

When this room was used in connection to the salon/beauty parlour, I could hear almost all which was being said, the radio etc, albeit only during working hours.

My concern is that if this room is converted into the kitchen, the noise is very likely to increase significantly and now with the possibly of being 24/7, and also the risk of fire will undoubtedly be substantially increased.

I would therefore request that consideration is given to the issue of noise and fire risk and some recommendations to mitigate these concerns with fire proofing and sound insulation are made.

I think these issues need to be addressed for the well being of all residents living in such proximity.
Kind regards.

Kind regards
