

Would someone be able to set this up as a hazardous substance consent application, please? I don't think a fee would be involved but we would need to consult The Health and Safety Executive (HSE). Please could this be allocated to Kate Turner.

The description should read something along the lines of 'variation to application SP/44/92 to retrospectively correct the installed LPG storage on site from the approved capacity of 50t to 60t'.

The attached should be enough to get this application valid and live for consultation. Neighbours will need writing to as usual.

I hope that makes sense- happy to discuss if needed.
