Thanks for your prompt reply. I hope you will not mind that I take it as acknowledging my Section 211 notice, giving notice of my intent to carry out work to trees in a conservation area. I don't believe it is necessary to supply a reason for the proposed work but;

1. The Spruce is in a poor state and Ivy-covered. To all intents we are monolith-ing this to around 5-6 metres to maintain screening between the properties. There may be some lower branches which may be viable, these will be retained to maintain screening
2. Both the Tree of Heaven and the Fan Palm have outgrown their positions. Neither respond well to pruning at this stage of their life. The Ailanthus is a notoriously brittle tree, and extremely fast growing, unsuited for the relatively compact garden.

I hope this answers your questions adequately.
Many thanks David
