

KEY TO SYMBOLS

VISIBILITY SPLAY

Notes:

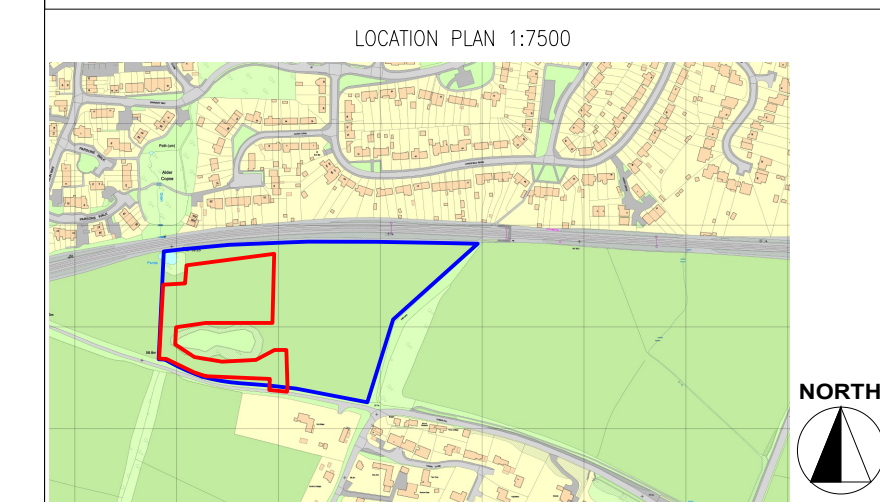

Parthings Lane is noted to be a 30mph zone and therefore according to the Manual for Streets (MfS) parameters, visibility splays of 43m each way would be required.

From the existing access, these distances can be achieved with the maximum distances to the west believed to be 47m and the maximum distance to the east believed to be 87m.

The existing passing places along the road will allow for the safe passage of vehicles.
