Stance: Customer made comments in support of the Planning Application

Reasons for comment: - Design
- Other

Comments:

In response to the Parish Council's comments.....

The agricultural barn has been sized in relation to storing machinery and feed in addition to animal shelter.

The footprint of the new building is the same as the existing structure that's being demolished. The height of the new barn will

be 2m lower than the current building.
The walls will be clad with timber slats and the roof structure to be green in colour which is a standard construction for agricultural buildings.

The site is designated as a farm, which as proposed will contain an approved number of various animals, details of which have been submitted and in principle approved. The old barn was for Agricultural use and will now be demolished in favour of a modern design fit for use with modern day husbandry of the proposed livestock. Smaller than the earlier barn and away from being directly below the HV cables

Kind regards
