SUMMARY OF COMMENTS & RECOMMENDATION:

We cab confirm that the Construction Method Statement and supporting information that is required by Condition 10 references the need for an archaeologist to be present to mo9nitor excavation works and so can confirm that we are satisfied that Condition 10 can be discharged

MAIN COMMENTS:

The planning approval (condition 15) requires that a programme of archaeological monitoring during construction is undertaken in accordance with a Written Scheme of Investigation produced by JBA Consulting. The Construction Method Statement that is provided to satisfy Condition 10 clearly references that an archaeologist will be present on site to monitor all excavation works and so we can confirm that the CMS is acceptable and so have no objection to the discharge of this condition.
