Dear Sir/Madam,

Proposal: Erection of a car port, leisure suite and padel court. Conversion of the tank room into a holiday let.

Site: Lock House, Lock Partridge Green, West Sussex, RH13 8EG.

Thank you for your correspondence, please see our comments below regarding the above application.

Development Site is not within Southern Water's Water Supply Area

The development site is not located within Southern Water's statutory area for water supply services. Please contact South East Water who are the relevant statutory undertaker.

Existing Southern Water Assets – General within boundary but no tree, buildings, assets within standoff distance (approximate)

Please see the attached extract from Southern Water records showing the approximate position of our existing sewer and water main assets crossing/in the vicinity of the development site. The exact position of the public assets must be determined on site by the applicant in consultation with Southern Water before the layout of the proposed development is finalised. To get in contact to confirm the exact position of the asset please visit;

https://www.southernwater.co.uk/media/ph4fk3pe/ds-location-of-rising-mains_pb.pdf.

For information on required stand-off distances from public sewers please refer to:

<https://www.southernwater.co.uk/media/st5orjvm/stand-off-distances.pdf>

Connection to water distribution main

Our investigations indicate that Southern Water can facilitate water supply to service the proposed development. Southern Water requires a formal application for a connection to the water supply to be made by the applicant or developer.

To make an application visit Southern Water's Get Connected service:

<https://developerservices.southernwater.co.uk> and please read our New Connections Charging Arrangements documents which are available to read on our website via the following link www.southernwater.co.uk/developing-building/connection-charging-arrangements

Proposed Soakaways

The Council's Building Control officers or technical staff should be asked to comment on the adequacy of Soakaways to dispose of surface water from the proposed development. No new Soakaways should be located within 5 metres of a public or adoptable gravity sewer, rising main or water main.

No Soakaways should be connected to the public surface water sewer.

Septic tank proposed

The Environment Agency should be consulted directly by the applicant regarding the use of a septic tank drainage which disposes of effluent to sub-soil irrigation.

Due to legislative changes effective from 1st October 2011 regarding the ownership of sewers, it is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction work, an investigation of the sewer will be required to ascertain its ownership before any work commences on site. If this happens, please call our Customer Service Desk on 0330 303 0119.

For further advice, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (Tel: 0330 303 0119)

Website: southernwater.co.uk or by email at: SouthernWaterPlanning@southernwater.co.uk

Yours faithfully,

Future Growth Planning Team
