Dear Ms Howe

Application for tree cutting

I am replying to your email dated 21 July 26 in which you advise our previous application was invalid.

The magnolia tree is in our front garden which faces East. Opposite our house is Tannery Barn. The tree is very tall now and the branches have all grown proportionately.

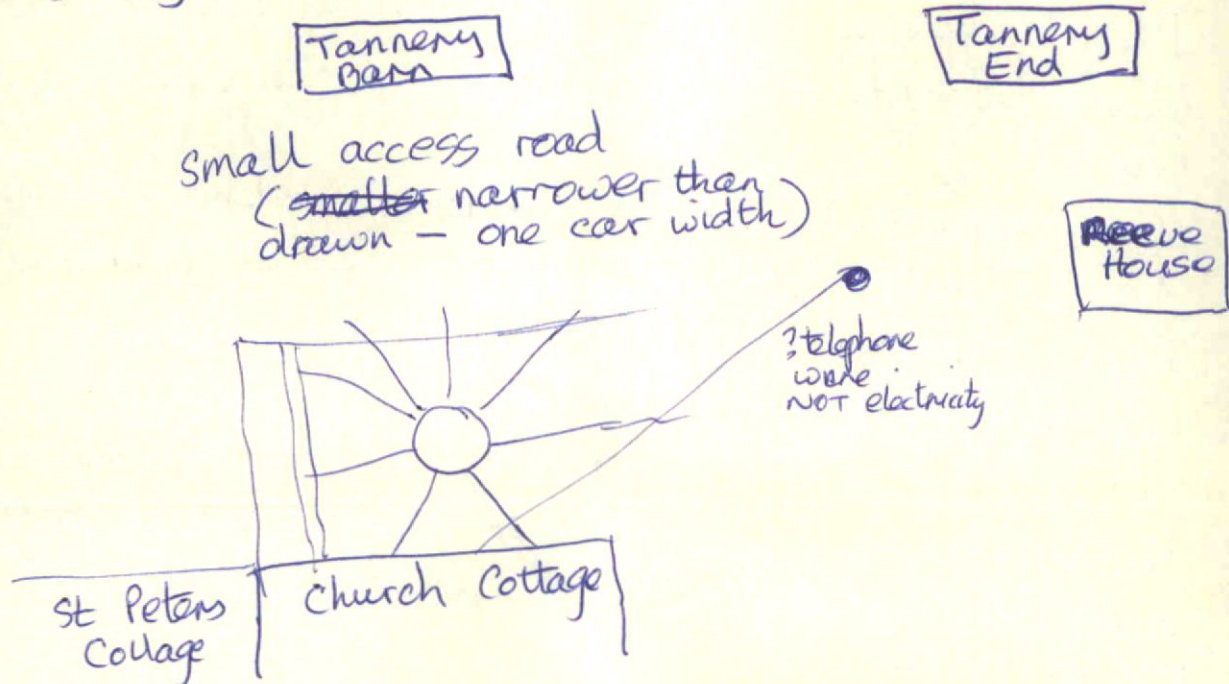

The branches facing our house are almost touching our house. Those over the small road are starting to interfere with vans as they access houses.

The branches to the south have started to interfere with an overhead telephone wire I believe.

In the small front garden they are now interfering with people/children as they enter the garden.

We have had a tree surgeon to advise of what is required.

- ① The tree is 9m tall and 9m from tip of branch to tip of opposite branch. The tree surgeon advises about 30% reduction in height and to each branch. The tree will be worked on all sides in order to keep the shape. We are aware of late summer cutting.

We look forward to hearing from you.
Thank you for your attention.
Yours sincerely
Julia Richards
