REF: Hills12

Hills cemetery protected tree maintenance plan.

TPOs 0357,1279,1312,1500.1550

Red line indicates proposed area.

I would like to apply for a 12 year ongoing tree works application to perform essential works to these trees to aid tree inspections. I would like to perform any necessary epicormic or basal sucker growth from the species here on an annual cyclical basis or as required by our contracted inspectors.

This is to facilitate the annual tree-health inspection of the tree stock here and to prevent the overlooking of hard to spot but significant fungal species such as *Kretzchmaria deusta*

Suckers to be removed to ground level.
