Subject: Re: Tree Application Invalid - DC/25/0271

[redacted] [redacted]

Dear Sir/Madam
With reference to your questions concerning this application here are the answers!
The current height of the two Poplar trees are approximately the same and about 26-27m, pruning back all branches in all direction (a re pollard) by approximately 8-9m will then give a finished height of 16-17m and a width of canopy of about 8-9m.
Hope this information and photos help.
Thanks
Clive Richards.
