Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Loss of General Amenity - Other - Privacy Light and Noise
Comments:	I am writing to register my strong objection to the above planning application. As a local resident, I believe the proposals will cause significant harm to both the visual character of the area and the living conditions of nearby residents. My objections are based on the following material planning considerations:1. Design, Appearance, and Impact on Heritage AssetsCharacter of the Village: The proposed shop front alterations, fascia signage, and overhead lighting are entirely out of keeping with the traditional aesthetic of our village.Setting of Listed Buildings: The materials, scale, and modern design of the signage and lighting look highly out of place. They fail to respect or complement the surrounding

listed buildings, detracting from the historic character of West Street.Rear Extraction Duct: The scale and industrial appearance of the replacement extraction duct at the rear of No. 3 is highly intrusive. It fails to preserve or enhance the setting of the adjacent listed structures.2. Noise Pollution and Residential AmenityUnacceptable Noise Levels: The replacement kitchen extraction duct and associated equipment generate continuous, disruptive noise. This noise exceeds acceptable environmental health levels for a residential area.Impact on Homes: The constant hum and vibration severely impact the ability of residents to enjoy peace and quiet inside their own homes, disrupting sleep and daily life.3. Odour Pollution and Environmental QualityAir Quality Degradation: The extraction system heavily pollutes the local air with strong, persistent cooking odours from kebab and chicken meat.Loss of Amenity: These heavy odours penetrate nearby residential houses and blanket local gardens. As a result, residents are unable to open their windows or use their outdoor garden spaces, severely diminishing their quality of life.ConclusionFor the reasons stated above, the development is contrary to local planning policies regarding heritage conservation, design quality, and residential protection. I respectfully urge the planning committee to refuse planning permission for these alterations and equipment.Thank you for considering these comments.
