Subject: Betulabrook West Chiltington tree surgery

[redacted]

Dear Mr Bush

[redacted]

[redacted]

[redacted] the info required now.. The height of the tree is approximately 45 ft, and when pruned would be 41 ft. The East branches are approximately 20 feet, and when pruned, would be 8 feet. The South branches are approximately 9 feet and when pruned would be 7.5 to 8 feet, the North branches are approximately 10 feet, reduced to 8 feet and the west branches are approximately 10 feet, reduced to 8 ft.

The reason for the work is to reduce the overall size of the tree, part of which is over our neighbours' property, and to remove some lower branches to let more light in and allow better plant growth.

I hope that this is going to be sufficient.

Thank you for your attention.

Yours faithfully

Ian Carlson-Hedges
