

Soft Landscaping

S1 Existing boundary vegetation to be retained, protected and enhanced.

S2 Smaller native and ornamental trees to be planted along roads, providing a natural vertical element as well as shading and ecological benefits.

S3 Proposed smaller native and ornamental trees to be planted in back gardens, to provide screening as well as providing ecological benefits.

S4 Planting in front gardens to be an informal mix of evergreen and deciduous shrub as well as perennial planting. This mixture will provide seasonal interest as well as ecological benefits for bees and other pollinating insects.

Boundary Treatments

B1 Hedge planting or fencing as well as ornamental shrub and perennial planting has been used to define private spaces.

B2 Timber post and rail fencing provided to front gardens located on the boundaries facing open space.

B3 Estate railings provided in front gardens in principle street character area.

Hard landscaping

H1 Tarmac road surface used in combination with Tegula block paving in Slate to parking areas, help to define character areas and aid with wayfinding.

H2 Secondary streets laid with Tegula block paving in Heather, defining character focal areas and creating shared surfaces.

H3 Private driveways laid with Pedesta Concrete block paving in Bracken used to differentiate from public realm and create a softer transition to areas of open space.

H4 Rumble strips laid in silver grey setts transition between surfaces and define raised tables, helping to slow traffic and define the road hierarchy across the development.
