44 The Hordens
Barns Green
RH13 0PJ

Commoner type, a member of the Public ; Stance Object

We would like to voice our objections to the above planning application.

The already frail infrastructure of Barns Green village has already been pushed beyond its limits especially for sewage .

The noise and disturbance we have had to endure with the current building of Sumner Fields, the rural roads within the village especially the Hordens has seen huge lorries going up and down residential roads which is something we do not want or need again.

The proposed plans will increase the volume of traffic which will affect both our shop and pub which are vital assets of the village.

So far as Infrastructure and Services the increase of flooding, recently experienced, has shown that the village is prone to flooding.

The proposed plans require the removal of an ancient hedgerow which runs along the edge of the site being a refuge for wildlife and acts as a buffer, thus reducing the surface run off water and historically adds to the rural character of the village.

Finally, the development presents a disproportionate increase in the number of dwellings in the Parish which is out of alignment with neighbouring properties, such a dramatic change closely follows the two recent significant developments in Barns Green.

Yours sincerely
