Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Other - Privacy Light and Noise
Comments:	The construction of this extension will overshadow our conservatory, which we use as a dining room. This will affect the light and our view and during building works, presumably our privacy too. We have concerns around the building works included as they will mainly be completed by the owner on his own, which will lengthen the period of time we will be disturbed by noise and when other tradesmen are employed or deliveries made, or a skip is in use there will be disturbance in the road at the front of our property

and there will be an impact on available parking spaces, as the residents have 3 vehicles and based on past experience they will need to use the shared parking spaces for extensive periods.

I work from home and although I understand that improvement or development works are to be expected, the resident has been doing works for a long period of time now and I am disturbed in my upstairs office, which is at the back of the property. I am often in online meetings or taking phone calls. Drilling and hammering has also disturbed us in other areas of the house, including at weekends.

For this reason we would like to ask for some boundaries around how long the work will take and also working hours and days.

Kind regards
