Comments:	I am a nearby resident and wish to register my support for this planning application submitted to Horsham District Council. The proposed dwelling is positioned immediately adjacent to the existing built-up area of the village and, in my opinion, represents a logical and sympathetic rounding-off of the settlement. Rather than constituting an intrusion into the open countryside, it would form a natural extension to the established pattern of development at the village edge.

Having a good understanding of the local area, I consider the scale, siting and design of the proposed single detached dwelling to be appropriate to its surroundings. The development would sit comfortably alongside neighbouring properties and would not appear out of character or visually intrusive within the landscape.

The proposal is modest in scale and would not amount to overdevelopment of the plot. It makes efficient use of land that is already closely related to the settlement, while retaining the essential rural character and openness that define this part of the village.

I do not consider that the development would result in any material harm to neighbouring amenity. There would be no significant loss of privacy, outlook or natural light to adjoining properties, and I do not anticipate any notable increase in traffic generation or disturbance on local roads.

Furthermore, the provision of an additional dwelling within walking distance of village services and facilities would contribute positively to the sustainability and vitality of the local community, helping to support rural services over the longer term.

Overall, I believe this is a well-designed and carefully considered proposal that would integrate successfully with the existing settlement boundary

Kind regards
