Reasons for comment:	- Other
Comments:	This is an additional note regarding the evidence of bats in the proposed development area. The Ecological report stated that there could not see any evidence of bats roosting so the development would have negligible impact, however as all bats are a protected by Law under the Wildlife and Countryside Act 1981, any disturbance is against the law. It has been noted by guests staying at the Air B n B on their

property that they saw the bats and owls last year when staying there.

This development will disturb the roosts and surrounding foraging areas. I cannot see how it would not be possible, to not disturb them, or for it to not have any detrimental impact on them, therefore the Law should protect them and the environment that is so important to them.

Kind regards
