COUNCIL **TPO** APPLICATION DOCUMENT

TYPE OF APPLICATION: TPO

OUR WORKS REFERENCE: ENAO023

ADDRESS/LOCATION OF WORKS: Washington Road, Storrington and Sullington, Storrington, Horsham, RH20 4BZ

DESCRIPTION OF WORKS:

Our company (Traffic Control 123 Ltd) work on behalf of Enerveo, clearing necessary lighting columns of trees and foliage. These works are necessary to allow access to facilitate the repair/maintenance of street lighting, as well as to uphold public safety.

We have been instructed to clear a lighting column located on Washington Road – (Grids: 509252 , 114166)

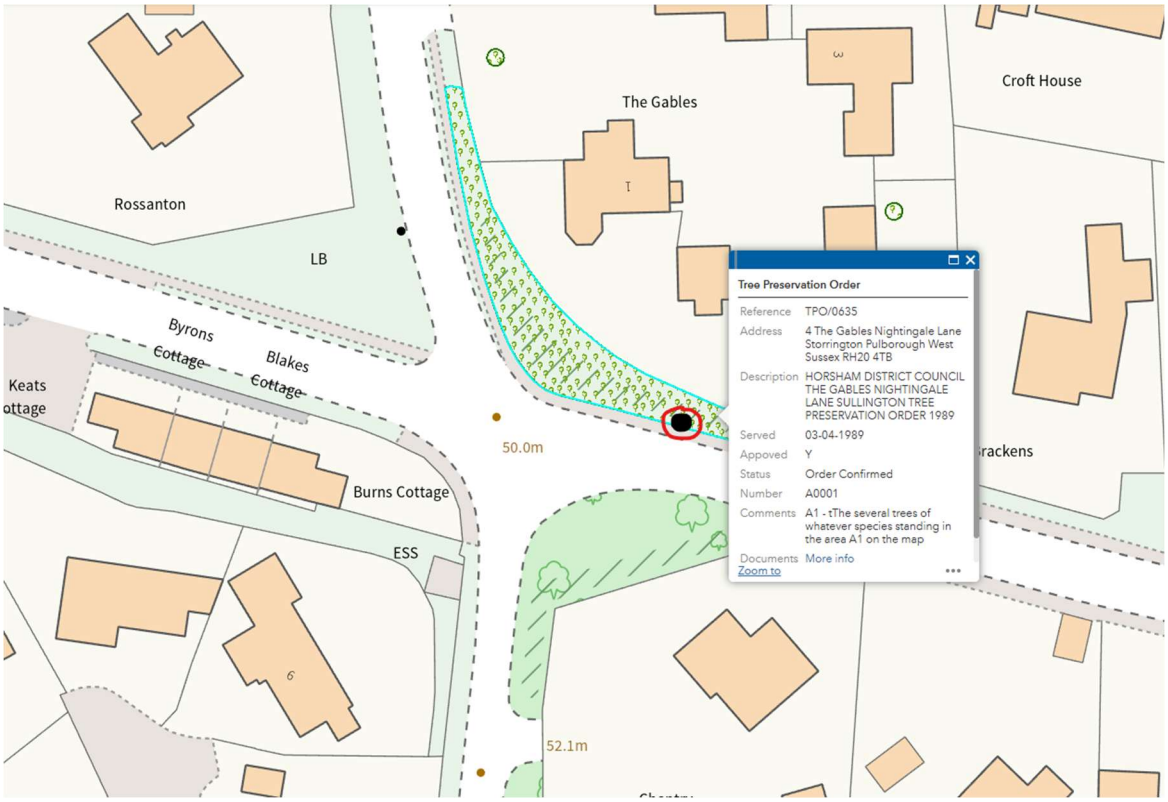

The lighting column is attached to the pole at this location, and there are currently two tree trunks either side of the pole, that are impairing the light from reaching ground/road adequately.

We have a works specification that dictates we are to clear from the top of the bulb down at a 60 degree angle (in front, and either side).

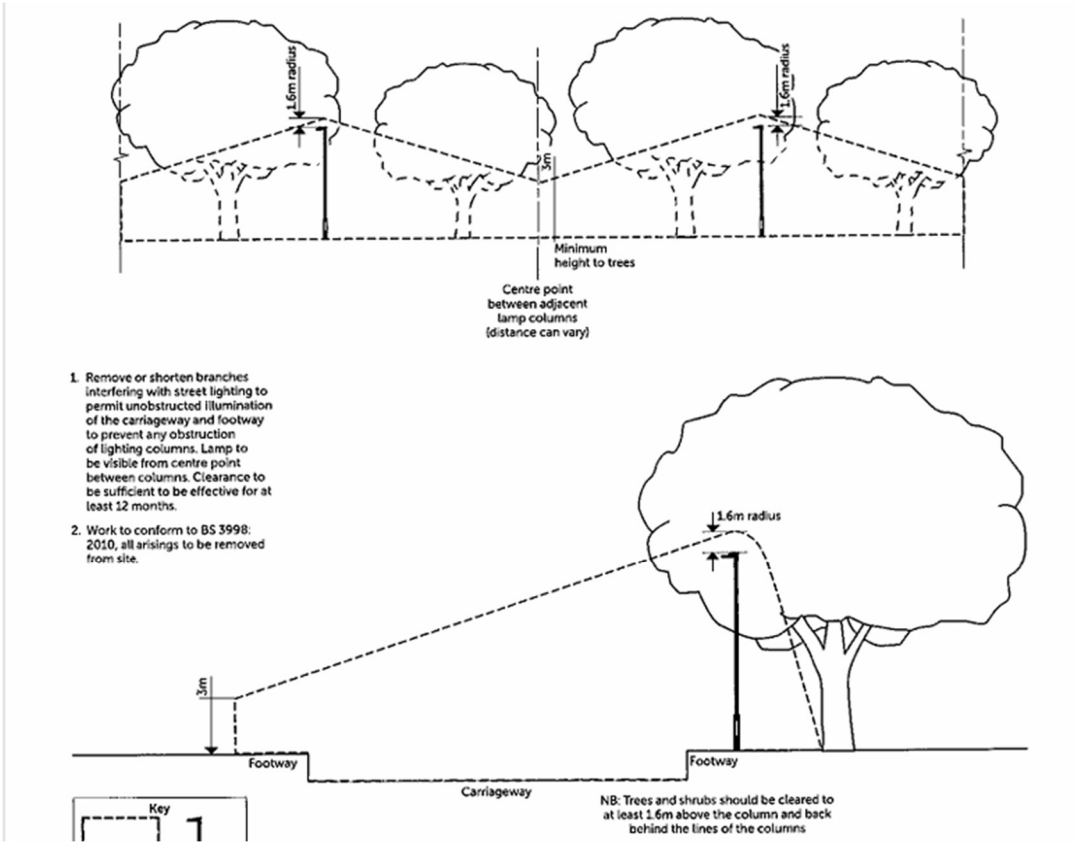

I have provided the following details along with site photos taken to highlight the works that are required.

I can see from the council map, that the trees we are required to cut, are affected by TPO's. I am therefore applying for permission to cut these trees.

TPO NUMBERS (IF KNOWN): TPO/0635

Cutting Specification document:

As you will see from the below photos, two tree trunks sit in front of the lighting column These will therefore need to be removed, where the lines are marked in red.
