Categories: Trees in a Conservation Area

Good Afternoon Olivia

Thank you for your email.

Because you are in a Conservation Area, any proposed works to trees do need to be formally registered with the Council under a Section 211 notice. We do have enough information on the email below to set this notification up for you.

I have cc'd in the validation team as they will register the notification, review the details to make sure we have enough information to make the notification valid and then the proposed works will be considered.

We hope this helps.

Hello,

I am writing to ask some advice about cutting down some trees in our garden at the above address. We live in the Thakeham conservation area.

The first two trees are at the front of the first picture attached - one is a yew and one is a conifer. They are growing up into our large Ash tree, which has a tree preservation order.

The third tree, as picture in the second picture, is a crabapple tree which is dead.

We would be very happy to replace these trees with new trees (eg fruit trees) if required.

Do we need to seek any permission to remove these trees or can we proceed?

Kind regards
Olivia Newport
