Subject: Re: Beech Tree, Wildwood, Winterpit Lane, Mannings Heath

Hi Andy,

Thanks for coming out last week to look at the Beech tree.

Following from our discussion I would like to ammend the application in regards to the specification of the crown reduction. I would like to reduce the height of the crown by approximately 3m.

Amending the specification by requesting to reduce the lateral sections of the crown by 3-4m. This is due to the length and weight of the lateral limbs which grow towards the access road of forest park, but also to relieve weight on the low union of the subdominant leader which has included bark. The aim of the 3-4m spec is to allow more of a weight reduction by drop crotch techniques. Leaving suitable growth and adhering to BS3998.

If you require any further information please do not hesitate to contact me

Kind regards
Max Varney
