

PLANNING APPLICATION, REF. DC/26/0671

LETTER OF OBJECTION TO THE ABOVE

Dear base Officer & councillors

This planning application is about building on an ~~an~~ area of outstanding beautiful countryside, (AONB). This area is on the outskirts of our Market Town which is rapidly growing into a sprawling open mass, with neither the infrastructure, amenities or facilities, as well as taking farmland. We need farmland to grow our food & have dairy products. Farms ^{are} beautiful open spaces. We import lots of food when we would have fresh homegrown food on our doorsteps. The relief of the natural world with all it gives us cannot be underestimated. There is a much bigger picture here for our future to be aware of, certainly a better way of life for us all & most importantly of all future generations.

We need our open spaces with freedom to enjoy our unspoilt countryside. There will be estates with plenty of concrete, bricks etc across the other side of the A264 being built on farmland!

Our mental well being & health need our trees & nature too. Littlehampton station will have more

commuters parking in an already congested area.

These houses will not be housing the homeless or people on low incomes so will not benefit our society at all, except to make a profit for someone who will not live here. I have lived here for nearly

60 years & am in my late [REDACTED] it's a happy ^{time} to bring up a family & make a life here. Please realise the community will not be the same & lose its individuality as well as its countryside. Yours very sincerely [REDACTED]
