To: The Planning Team, Horsham District Council

Planning application reference number: DC/26/1048

Dear Planning Team

We, [REDACTED] at 74 Merryfield Drive are writing in support of the objections already submitted by other residents of Merryfield Drive concerning the redevelopment of Greenway School, particularly those comprehensively outlined by [REDACTED] 70, Merryfield Drive.

Our particular concerns are of any environmental impact caused through:

- inadequate attention to issues of landscaping as outlined by [REDACTED] 70, Merryfield Drive
- the height of the proposed new building being unclear given the additional hardware on the roof
- the larger windows impacting on noise levels from the school and privacy in our upper storey (bedrooms and home office).
- the exact distance of the building from our boundary, whether from the rear of our house or our garden, which is not clear to us from the outline plans.
- external security lighting which could affect our quality of life, particularly at night if it is not motion sensitive. This could have a negative effect on nighttime invertebrates and mammals which frequent our gardens.
- the addition of a large external industrial chimney. Not only will this be unsightly there is the possibility of unfiltered particles escaping into the atmosphere if the equipment is not adequately maintained. The maintenance budget is often the victim of any cost cutting exercise when education budgets are stretched.

We acknowledge that a new school building is required for Greenway School. We ask that residents are shown consideration when the planning team discusses this application. We are requesting that planning conditions are considerate, comprehensive and adhered to. We would appreciate adequate information is made available to the affected residents in a timely fashion so that we are dealing with facts, not rumour.

With regards
[REDACTED]
