Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Privacy Light and Noise
Comments:	Maintenance is a concern because sand surfaces require regular brushing to prevent sand compaction and may become slippery if not maintained properly. Would the village be expected to fund this? Sand is a hard surface and rubber softer therefore is less likely to cause injuries.

Also with rubber being more shock absorbent it deadens sound on impact causing less disturbance for birds and other wildlife and local residence.

This being a worry given the publicity around noise nuisance concerning MUGAs

Kind regards
