Subject: DISC/26/0101 - noise management plan

Categories: Consultations

Please could this be passed to the manager/owner:

To whom it may concern:

We have been passed your submission for the discharge of condition for your recent planning consent.

What has been submitted proposes the use of a sound level meter to monitor noise at times. Whilst we welcome this approach, to buy the equipment is expensive, it requires maintenance and a level of technical competency for the users which is a burden on the business.

A more straightforward approach for you would be things like:

- No external speaker systems;
- Location of music set up being away from nearest residential properties;
- Doors and windows being kept shut when performances are in progress;
- Manager on shift monitors outside noise and noise breakout routinely throughout performances by walking the boundary and taking action (reducing volume) if deemed necessary;
- Reminding people to be mindful of neighbours when using outside spaces.

Simple pragmatic measures like this do effectively manage noise, and are simpler to implement by your team.

If you would find it useful, we are happy to meet with you at your premises to assist with getting a mutually acceptable noise management plan drawn up? Alternatively, please feel free to respond to me directly by email.

All the best,

Fiona Hiron
Environmental Health Officer
