Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Other - Overdevelopment
Comments:	The reason for my objection is: Incomplete Documentation ie No ICNIRP Certificate National Planning Policy Framework Section 10 Supporting High Quality Communications Point 117. Applications for electronic communications

development (including applications for prior approval under the General Permitted Development Order) should be
supported by the necessary evidence to justify the proposed development. This
should include:
b) for an addition to an existing mast or base station, a statement that self-certifies
that the cumulative exposure, when operational, will not exceed International
Commission guidelines on non-ionising radiation protection.

Even though the applicant is utilising permitted development rights, the proposed 6 new antenna are NEW EQUIPMENT and therefore should be supported by an ICNIRP Certificate. If this is not obtained how is the Council to meet its obligations to protect the health of its residents as they are obliged to do under the Health and Social Care Act 2012, National Health Service Act 2006 and EECC 2018.

Kind regards
