

[REDACTED]

LAND OFF NORTHLANDS LANE, STORRINGTON RH20 3EZ.

REF: DC/25/0450.

Further to email from [REDACTED] to HDC dated 1st February 2026.

In the noise management plan supplied by the applicant item 10 states "the use of the field is granted exclusively to a single user ... " No mention of two fields.

Item 20 states "As there is single user of the field at any one time the provision of onsite parking cannot be required ... "

There are two fields. Possibly two users?

Why cannot parking be required on site. It is unsafe to let out antisocial dogs on a public/private drive/footpath prior to going into the secure area.

Parking needs to be supplied in the smaller field inside the safe 6 ft high fenced area. Any dogs going to the larger field can cross from the existing gateways opposite each other part way up footpath SAS2448.

The designated parking area suggested in item 20 is on a public footpath. This would not be satisfactory.

Any secure dog area requires fencing of a minimum 6 ft height. Any gate must also be 6 ft high.

[REDACTED] Dogs requiring a secure area are a potential danger to small children and others.

Full public liability insurance must be provided and evidence of this should be posted on site.

The large field should be fenced in such a way that the suggested "noise reduction area" is outside the fenced area so no dog can enter it. A plan showing the fence line needs to be agreed with the East Wantley residents.
