RE PLANNING APLICATION FOR MOORINGS WASHINGTONB ROAD STORRINGTON REF:DC/24/1769

Dear Emma Parkes,

I have had the opportunity to view the planning application for the structure of a two storey building on m y neighbours property.

This proposed building would be on the border of my property.

The footprint of the proposed two storey building takes up a lot of the existing plot.

The roofline of the proposed building will definitely block daylight from my property.

In my opinion the size of this structure is more like that of a second dwelling of granny annex.

I think the hedge would have to come down and if I own the hedge or partly own the hedge, I don't wish this to be cut down I regard it as a security measure.

I also object to builders or scaffolders coming onto my property as this structure is so close my land.

The time of year they propose to do this is the spring when the hedge is used as a nesting site for many garden birds.

I most vehemently oppose this application as this is far too big structure and is 2/3 the size of the existing main house.

It is also far too close to my property.

Yours sincerely
