STUDY

This architectural drawing shows a side elevation of a house with a complex roof. The main roof is a steep gable. A smaller gable is centered on the front facade, containing a chimney. To the right, there is a section with a lower, hipped roof. The drawing uses fine lines to represent roof shingles and horizontal lines for siding. A small window is visible on the right side of the house.

This architectural elevation drawing shows a two-story house with a gabled roof. The front facade features a central entrance with a small gabled porch supported by columns. To the left of the entrance is a large window with multiple panes, and to the right is a smaller window. The second story has a large window on the left and a smaller one on the right. The roof is gabled, and the walls are textured to represent siding. The drawing is a black and white line art illustration.

This architectural drawing shows a side elevation of a house. The main structure has a steep gabled roof. To the left, there is a chimney with a smaller gabled roof. To the right, there is a lower section, possibly a porch or a smaller addition, also with a gabled roof. The drawing uses simple lines to define the rooflines and walls.
