Subject: Advice for pruning trees along driveway

[REDACTED] [REDACTED]

I am seeking advice on pruning 2 trees on my driveway.

One is a tall pine tree that requires cutting off 3 metres from the top and tidying branches.

And a Hornbeam that requires 3/4 meters off top and shaped around edges.

Both trees have been requested to be pruned by neighbour in new house build close to boundary line.

Our property boundary is at limit of conservation area.

The map shows no conservation order on trees relevant to this request.
