Afternoon Halima,

I can confirm that following the site visit this morning at Jarvis Lane, Steyning, West Sussex, in relation to pre-commencement Condition No. 6 attached to the consent issued under DC/25/2149, and subsequent submission of the attached updated plans, I am satisfied that the tree protection measures in place on site are adequate.

I can also confirm that the pre-commencement site meeting between the myself, Luke Burley the Arboricultural Consultant, and Mark Windus the Site Manager, as required by the condition, has been satisfactorily undertaken.

The arboricultural supervision statement element of the condition was discussed in full, and I can advise that, except for the final report being submitted to and approved in writing by the Council upon completion of the development, I am satisfied that the pre-commencement aspects of the condition have been met in full. As such no further tree information other than the supervision report upon the completion of the scheme is needed to the development to proceed from an Arboricultural standpoint.

Kind regards,

Andy

Andrew Bush

Arboricultural Officer (Planning)
Specialists Team - Strategic Planning
