Design Statement.

The proposal is to replace the three number windows to the south and west elevations for the first floor flat No. 33.

The existing windows are white painted softwood timber with single glazed units.
Being in excess of 33 years old they were the original fitments installed when the development was first built in 1990. They are now in poor condition, badly fitting, non energy efficient and lacking modern security as now needed.

The proposal is to replace all the flat No 33 windows with modern white UPVC windows with double glazed units to current building regulation thermal values.

The proposals will be compliant to Horsham Local Planning Framework, primarily meeting Sustainable Development Policy 1 by the new thermal compliance of any door or fenestration installed.

Development Principles Policy 33 will also be satisfied in that the proposed replacement units are being made to match the existing style of the original doors and windows. The overall look of the development will not be altered in any way.
